Portfolio <https://danielll.dev>

Frontend Developer with over 4 years of experience building and scaling web applications in Agile environments. Proficient in TypeScript, React, Vue, Node.js (Nest.js). Experienced leading a small team, optimizing performance, and integrating third-party APIs to deliver impactful solutions. Proven track record of contributing to impactful projects such as hyperlead.vn, langfarm.com, and casio.anhkhue.com.

Skills

Frontend Development: React.js, React Native, Vue.js, Next.js, Nuxt.js, Redux, Zustand, Tailwind CSS, Ant Design, Material UI, Cypress

Backend & APIs: Node.js (Nest.js, Express), PHP (Laravel), RESTful APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud Storage & DevOps: AWS S3, Git, Docker (basic exposure)

Testing & Quality: Unit & E2E Testing (Jest, Cypress), Code Reviews

Agile & Collaboration: Jira, Confluence, Scrum/Kanban, Cross-functional Communication

Work Experience

2022-09 - Current

Software Engineer

WhammyTech, Ho Chi Minh City, Viet Nam

- Optimized loading performance, reducing page load times by streamlining bundling, caching, and image strategies.
- Architected project foundations using React, Next.js, and Vue.js for responsive, dynamic web applications, ensuring maintainability and scalability.
- Developed and maintained functional applications and APIs, ensuring seamless functionality across both the backend and frontend.
- Integrated various third-party APIs (e.g., payment gateways, shipping services), enhancing platform functionality and user satisfaction.
- Worked with mobile apps using technologies such as React Native.
- Led a small team of 2 developers, conducting code reviews, and mentoring.

2021-04 - 2022-09

Frontend Developer

RIO Technology, Ho Chi Minh City, Viet Nam

- Contributed to large-scale CRM, CMS, and HyperLead Marketing platforms, handling both frontend (React, Vue) and backend (Node.js, Laravel) tasks.
- Designed and integrated RESTful APIs with clear documentation and coding standards, ensuring consistent data flow across services.
- Maintained documentation of system architectures, and coding standards for product integrity and consistency.
- Worked closely with UX/UI designers to translate visual concepts into functional and dynamic web pages.
- Optimized critical rendering, reducing initial load times and reduce bundle sizes.
- Improved platform reliability by implementing unit tests and E2E tests (Cypress) to maintain high code quality.

2020-06 - 2021-04

Frontend Developer

Anflash Technology, Ho Chi Minh City, Viet Nam

- Developed and maintained functional applications and APIs, supporting websites on the back-end and front-end.
- Collaborated with UX/UI designers to transform visual concepts into engaging and interactive web pages
- Developed dynamic and interactive user interfaces using React.js, and created robust APIs with Laravel seamless integration.
- Deployed client projects using Filezilla.

Education

2018 - 2021

College Degree: Information Technology

Ton Duc Thang Univeristy - Ho Chi Minh City, Viet Nam.

Projects

Langfarm eCommerce | Fullstack Developer

Overview: Built an eCommerce platform focusing on user-friendly UI/UX to increase product visibility and boost sales.

Website: <https://langfarm.com>

Responsibilities

- Translated Figma designs into responsive user interfaces with Next.js and Tailwind CSS. Structured project folder and transform Figma designs into responsive, intuitive user interfaces.
- Implemented Nest.js backend services and integrated external services like Payoo, GHTK, VP for payments and shipping
- Provided solutions for storing static assets in AWS S3, ensuring scalable performance

Tech Stack

- Next.js 13, React Hook Form, React Query, Zustand, Radix-UI, Tailwind CSS, Node.js (Nest.js), AWS S3.

Ranhill SAJ Dashboard | Front-End Developer

Overview: A customizable, real-time data visualization platform with drag-and-drop widget support.

Responsibilities

- Built modular, reusable components in React (v18) with React Grid Layout for user-driven layout customization.
- Established real-time communication via backend APIs for instant data updates and system alerts.
- Enhanced user experience by optimizing chart rendering and ensuring responsiveness on multiple screen sizes.

Tech Stack

- React, Tailwind CSS, React Query, Redux, Apache ECharts

HyperLead Affiliate Platform | Fullstack Developer

Overview: An affiliate marketing platform for publishers to generate revenue from financial brand partnerships.

Website: <https://pub.hyperlead.vn>

Responsibilities

- Developed intuitive interfaces with Vue.js and React.js, ensuring a seamless onboarding experience for publishers.
- Optimized product page load times by refactoring code, bundling, and implementing caching strategies.
- Integrated Slack API for real-time notifications and leveraged cloud storage solutions (AWS S3, GCP, Minio).

Tech Stack

- Vue 2, Vuex, Vuesax, React.js, React Query, Tailwind CSS, Node.js (Express.js), Laravel 7, AWS S3, Google Cloud Storage

Certifications

2021-01	React Certification - Hackerrank 2021
2020-09	Problem Solving Certification - Hackerrank 2020
